

Waleed Ahmad

Associate Software Engineer | Full-Stack & AI Systems

Lahore, Pakistan | +92 331-9923377 | waleed.ahmadmunir@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Recent Computer Science graduate with 1.5+ years of hands-on experience building full-stack web and mobile applications and AI-powered products using React, Flutter, Python, and FastAPI. Delivered production software for international clients across real estate, healthcare, e-commerce, and SaaS, with additional experience in automation and CI/CD. Comfortable working across the stack and picking up new tools quickly.

EXPERIENCE

Automation & CI/CD Engineer

Apr 2025 – Feb 2026

Axelliant | Lahore, Pakistan

- Built end-to-end Playwright and Cypress automation frameworks for hybrid systems, reducing full testing cycles from 2-3 days to approximately 2 hours.
- Integrated automated testing into GitHub Actions workflows and parallelized execution to shorten feedback loops across development and release pipelines.
- Improved CI/CD reliability and deployment speed by streamlining test orchestration and reducing repetitive manual validation.

Software Engineer

Jun 2024 – Oct 2024

Ashtex Solutions | Lahore, Pakistan

- Developed and shipped client-facing web application features using React and supporting automation tooling across multiple software projects.
- Owned sprint planning and task tracking for the development team, keeping documentation and release notes current across every deployment.
- Ran QA checks against each feature before release, catching regressions early and keeping delivery aligned with sprint timelines.

Software Engineer Trainee

Jun 2023 – Aug 2023

Arrivy | Pakistan

- Led QA activities for an employee management system and an automation tool, with both products progressing to active production use.
- Executed quality checks and tracked delivery schedules to support stable releases and consistent engineering standards.
- Collaborated within a 7-member cross-functional intern team spanning development, testing, and delivery responsibilities.

PROJECTS

DeepShield | FastAPI, PyTorch, UCF, Xception, Grad-CAM++

- Developed an AI-powered deepfake detection backend using dual-encoder and CNN models, with Grad-CAM++ explainability and a four-band forensic confidence scoring system.
- Integrated Flutter/React clients with Supabase authentication, storage, and PostgreSQL, adding SHA-256 duplicate detection, automated PDF analysis reports, and blockchain-based result anchoring via Hardhat/Web3.

Arabia Hills | React, Supabase

- Engineered a real estate management platform for a UAE client supporting 20+ property listings with sub-second data retrieval.
- Automated bulk property data uploads, streamlining content management workflows for the client team.

WePsych | Flutter, Dart, Supabase

- Developed a cross-platform psychiatric law and practice application for an Austrian client, reducing administrative overhead by approximately 30%.

ALFA CLUB | React, Tailwind CSS, Cloudinary

- Built a responsive e-commerce storefront with a 90+ Lighthouse score while optimizing mobile checkout and media performance.

EDUCATION

Bachelor of Science in Computer Science

2026

National University of Computer & Emerging Sciences (FAST NUCES), Lahore, Pakistan

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Dart, SQL

Frameworks & Platforms: React, React Native, Flutter, FastAPI, Node.js, Supabase

AI & Data: PyTorch, Deep Learning, REST APIs

Testing & DevOps: Playwright, Cypress, GitHub Actions, CI/CD

Tools: Git, Cloudinary
